### REAL GENEROUS WITH OUR MONEY

To the Editor:

The United States government officials have for years been real generous with the taxpayers' money. They give loans to any country, regardless of whether it is an enemy of the free world or not. These generous public servants even subsidize Communist countries with money and materials.

NOW THESE eggheads have reached a new low with our money. The new headquarters of the Central Intelligence Agency (CIA), Washington, D.C., has a cafeteria with pinkish walls and is furnished with chairs made in Communist Yugoslavia.
